-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The claimed "processing aid" and "functional additive" overlap in scope.
4. The language "pigment or functional", "includes" and "and/or" is improper markush language.
5. The use of parentheticals is indefinite.
6. The use of "typically", "if present" and "preferably" is indefinite.
7. The use of tradenames in claim 13 is improper.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 1713

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

10. Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brady et al. US 6,031,047 or Berard et al. US 6,875,820.

11. Brady et al. teaches masterbatch compositions having chlorinated polyethylene and functional additives at column 11 lines 40+. The acrylic impact modifier are suggested at column 6 lines 50+. The difference between the claimed invention and this teaching is the patent fails to show each of the claimed ingredients in combination with one another. The invention is obvious from this teaching because each of the ingredients is shown and suggested to be used in combination. It is prima facie to combine ingredients and have them function in an expected manner.

12. The Berard et al. patent shows the chlorinated polyethylene masterbatch compositions at TABLE 1. The incorporation of acrylic impact modifiers is suggested at column 5 lines 15+. The difference between the claimed invention and this teaching is the patent fails to show each of the claimed ingredients in combination with one another. The invention is obvious from this teaching because each of the ingredients is shown and suggested to be used in combination. It is prima facie to combine ingredients and have them function in an expected manner.
